San Luis, Argentina | Open to Remote Opportunities

PROFESSIONAL SUMMARY

Software Developer with hands-on experience developing web applications, backend services, and business software solutions. Seeking an opportunity to contribute to a collaborative development team, continue building technical expertise, and deliver software that provides real business value.

TECHNICAL SKILLS

Databases: SQL, MySQL, IBM Db2, PostgreSQL.
Programming Languages: Python, Java, COBOL, JavaScript.
Developer Tools: Git, GitHub, Docker, Postman.
Backend Development & Integration: Python/Flask, APIs REST, Java/JDBC.
Practical Skills: SQL queries, data validation, functional testing, business process analysis and troubleshooting.

EXPERIENCE

GRANTFOX / / OPEN SOURCE CONTRIBUTOR / / REMOTE 2026 – Present

- Analyzed reported issues in collaborative repositories and implemented bug fixes and improvements to existing applications.
- Contributed to feature development and service health-check endpoints.
- Collaborated through GitHub workflows, pull requests, and code reviews.

UNIVERSIDAD NACIONAL DE VILLA MERCEDES / / INTERNSHIP / / Mar 2025 – Mar 2026

- Gathered and analyzed requirements from a local business to identify operational challenges and propose a software solution.
- Designed and developed a Python/Flask-based application to manage business information and inventory.
- Implemented and validated features for processing and managing business data.
- Conducted functional testing and presented the completed solution during an academic project defense.

FEATURED PROJECT

Electoral Registration System / UNIVERSIDAD NACIONAL DE VILLA MERCEDES / Feb 2025 – Mar 2025

- Developed a desktop application for managing electoral records.
- Implemented authentication, user management, data validation, and statistical reporting features.
- Presented the project at the university as a fully functional software solution.
